Objective

Passionate and driven MERN Stack Developer with a solid foundation in web development and a strong eagerness to grow in a professional environment. Over the past year, I've gained hands-on experience building responsive and user-friendly interfaces using HTML, CSS, Bootstrap, JavaScript, and React.js. With a working knowledge of the full MERN stack (MongoDB, Express.js, React.js, and Node.js), I'm now seeking opportunities to deepen my backend skills, collaborate with experienced teams, and contribute to real-world projects. I bring a positive attitude, strong problem-solving abilities, and a commitment to continuous learning and improvement.

Education

The Islamia University of Bahawalpur. BS in Computer Science 2021 – 2025 (GPA: 3.69/4.0)

Experience

Bclix Technologies –Bahawalnagar, Pakistan

Frontend website Developer, September 2022 – Dec 2023

A results-oriented Frontend Developer with 1 year of professional experience at Bclix Tech, where I built user-centric web interfaces utilizing HTML, CSS, Bootstrap. Possessing a strong foundation in web development principles and a passion for creating interactive and visually appealing experiences.

Frontend Developer | MAGMA Solutions

Duration: 3 Months

- Collaborated closely with backend developers to integrate APIs and dynamic data, enhancing functionality and performance.
- Optimized website performance by implementing best practices for speed, scalability, and accessibility.
- Worked on debugging and troubleshooting UI issues to deliver polished and bug-free applications.
- Contributed to the development of reusable components, improving efficiency in project delivery.
- Communicated regularly with stakeholders to ensure alignment with project requirements and goals.

MERN Stack Developer | FairChance for CRM *Duration:*

4 Months

- Collaborated closely with backend developers to integrate APIs and dynamic data, enhancing functionality and performance.
- Built dynamic CRM features using React, Node.js, Express, and MongoDB.
- Integrated APIs for real-time data and smooth frontend-backend flow.
- Created reusable components to speed up development.
- Fixed UI bugs and optimized app for performance and scalability.
- Worked closely with the team and stakeholders to align with business needs.

Skills & Abilities

- Proficient in HTML, CSS, Bootstrap, PHP, and JavaScript
- Frameworks like React Js, Next Js
- MERN stack development
- Strong soft skills including management and computer basics
- Experience with tools such as Text editors, VS Code, Visual Studio

Projects

Auction Bidding System (Final year Project)

- **Technology Stack:** MERN (MongoDB, Express.js, React.js, Node.js)
- Designed and developed a dynamic platform for online auctions, allowing users to create, bid on, and manage auctions in real-time.
- Implemented secure user authentication and role-based access using JWT and bcrypt.
- Utilized MongoDB for data storage, ensuring efficient management of auction data and bid histories.
- Created a responsive and user-friendly React.js interface with dynamic components for real-time bidding updates.
- Developed RESTful APIs in Node.js and Express.js for seamless backend functionality and communication.
- Integrated features like live bidding updates using Socket.io and auction timers for a smooth user experience.

More Projects:

- Expense Tracking System (MERN Stack)
- Computer Zone Website (React Js, Tailwind CSS)
- Furniture single page website (React Js, Tailwind CSS)
- Educity (React Js, Tailwind CSS)
- Food Ordering single Page (Next Js, Tailwind CSS)
